DETAILED ACTION

Amendment

1. Receipt is acknowledged of the Amendment filed June 8, 2004.

Allowable Subject Matter

2. Claims 1-11 are allowable over prior art.

The following is an examiner's statement of reasons for allowance:

Prior art teaches optical symbol scanners for detecting and decoding symbols lying on a surface. Some scanners found in prior art also include a shield mounted on the distal face of the scanning device. Prior art additionally teaches decoding symbols including patterns of fluorescent markings on a non-fluorescent surface. Prior art however, fails to teach the specific optical symbol scanner assembly disclosed in independent claim 1. The scanner device disclosed in the claimed invention includes a light generating means, which includes at least one black-light emitting diode and focusing means for focusing an image of the symbol on an imager device. The focusing means defines an optical axis. The scanner device further includes a shield mounted on the distal face of the scanner. The shield is disclosed to specifically be in the form of a hollow nosepiece having an open, wide proximal end fitting onto the distal face of the hand-held scanner device and a narrow distal end that is transparent to black light. The shield has a tapered shell that is opaque to the black light and narrows in the direction towards the distal end. This makes it so the black light illumination impinges on the symbol. The scanner device is able to view the symbol as produced by the fluorescent markings. The shield also includes an

optical passageway, which has an optic axis that is aligned with the optic axis of the scanning device. The specific features of the claimed scanner/shield assembly could not be found in prior art and moreover, one of ordinary skill would not have been motivated to come to the above claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
